PROFESSIONAL SUMMARY

Junior Python/Django developer pursuing an MCA, with hands-on experience building and deploying full-stack web applications using Django, HTML, CSS and JavaScript. Built projects featuring user authentication, database-driven features, push notifications and Progressive Web App (PWA) support. Seeking an entry-level web development role to grow backend and full-stack skills.

TECHNICAL SKILLS

Backend: Python, Django, Django ORM, Django Admin, Django Templates, User Authentication

Frontend: HTML5, CSS3, JavaScript, Tailwind CSS, Responsive Design

Web Concepts: Progressive Web Apps (PWA), Web Push Notifications, Model-View-Template (MVT) Architecture

Database: Django ORM

Tools: Git, GitHub, Render (Deployment), AI-Assisted Development

PROJECTS

SquadTurf – Sports Match Hosting Platform Live Link | GitHub Link

Django, JavaScript, Tailwind CSS, PWA

- Built a full-stack Django web application where users host “players needed” match requests and other players join, with user login and profile pages.
- Implemented a two-part player rating system (attendance and play quality) stored in the database, with validation for no-show players.
- Added web push notifications and live updates without page refresh, and made the app installable on phones as a PWA.
- Designed a responsive user interface with HTML, CSS, JavaScript and Tailwind CSS; deployed on Render with source code managed on GitHub.

Quiz Application GitHub Link

Django, HTML, CSS, JavaScript

- Developed a Django quiz application with multiple-choice questions stored in a database and managed through the Django admin panel.
- Built automatic mark calculation and a results page that shows the final score at the end of the quiz.
- Created a clean, responsive interface and deployed the application on Render using GitHub.

EDUCATION

Master of Computer Applications (MCA) Expected graduation–2027
University of Calicut

Bachelor of Computer Applications (BCA) 2022 – 2025
University of Calicut
